ADVANCED DIGITAL DISCOVERY (AD²)

Distance Virtual Learning

Course Overview

BlackHorse Solutions, Inc. is pleased to offer virtual interactive distance learning to support our customers' changing operational rhythm and accessibility constraints.

BlackHorse has created a unique and secure instructional platform utilizing US Government approved encrypted solutions through Office 365 applications which are Tier C compliant. This broad set of global compliance and data protection requirements includes ISO 27001, ISO 27018, EUMC, SOC 1 Type I & II, SOC 2 Type I and II, HIPAA and FERPA. The BlackHorse training platform enforces multi-factor authentication and industry best practice information assurance controls while enabling powerful training programs to operate with only an adequate internet connection and student computer.

AD2 equips your researchers with the necessary skills and tools to safely understand the digital environment in a manner that allows the student and your organization to stay a step ahead of those trying to cause harm to national security, your people, reputation, resources, assets, network, and supply chain. Students learn to safely discover, analyze, and report publicly available data and metadata, and critically to provide timely, actionable insights for decision makers.

AD2 utilizes a combination of Interactive Instruction and hands-on practical application centered around your organization's requirements. Students use a host of publicly available tools to enable the digital discovery cycle.

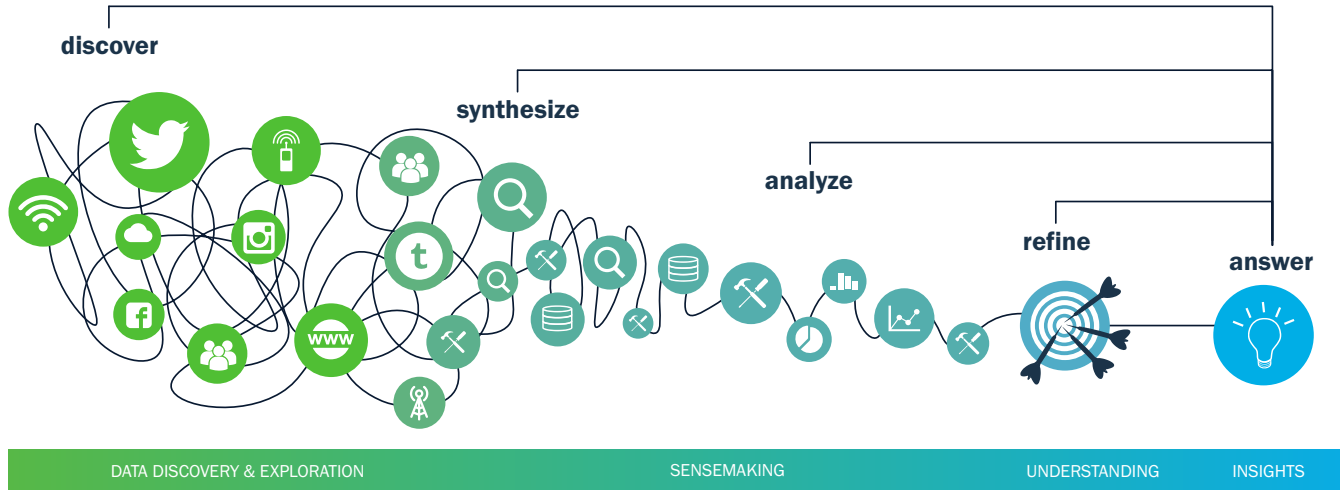

BlackHorse extracted the most relevant digital research methodologies from our proven CASO™ course and created a program of instruction focused on teaching effective methodologies irrespective of the tools being used, thereby maximizing your organization's ROI.

AD²: QUICK FACTS

- Distance Virtual Learning enabled for changing operational rhythms
- Train Anywhere: Safe and Secure online training solutions from home or work
- Advanced programs that translate to mission outcomes
- BlackHorse Instructors bring 200+ years combined experience and have trained more than 3000 in recent years
- Holistic, skills-based, and tool-agnostic training
- Hands-on training covering a wide scope of missions and skills

Skills Taught

Students are equipped with the necessary skills to safely operate on the internet, to include PROTECTING IDENTITY and assessing their DIGITAL FOOTPRINT, while simultaneously establishing a new frame of reference for undertaking digital research. Students will leave their time with us with the ability to implement newly learned skills at their respective organizations, provide active support to organizational requirements, and produce more effective research deliverables that provide meaningful context and information for stakeholders.

Course Schedule

Day 1

- Orientation & Setup
- Legal
- Online Attribution
